Objectives of the Program:

- To teach students about the community health, self-awareness and emotional well-being awareness.
- To provide in diagnosing the common diseases, Dental care, Eye camp, General Check up BP, Blood Sugar & ECG and blood donation.

Expected Outcome of the Program:

- Free medical advice, medicine to the unfortunate people and refer for specialized treatment or surgery whenever it is required.
- Campus make sure in getting the healthcare and seeing the doctor early enough before a small health problem turns serious.

Event Execution:

a) Health Camp: The Health Camp was set up in Mechanical seminar hall at Acharya Institute of Technology campus. The camp included various health-related stalls, booths, and stations, each offering different services such as:

- ❖ General health check-ups, including blood pressure, blood sugar, and BMI measurements.
- ❖ Basic diagnostic tests such as blood tests, urine tests, and ECG. Health counseling and consultations with doctors and healthcare professionals.
- ❖ Distribution of informational pamphlets and brochures on health awareness and preventive measures.
- ❖ Demonstration of first aid techniques and CPR training.

b) Blood Donation Camp: The Blood Donation Camp was organized in collaboration with Lions Club, Vaishnavi Lions Eye Care Center, K. L. E. Dental Hospital and Sparsh Hospital, Bengaluru. The camp was equipped with the necessary medical equipment

and staff to ensure a safe and hygienic blood donation process. Key activities included:

- ❖ Pre-screening of potential donors to assess their eligibility for blood donation.
- ❖ Collection of blood samples from eligible donors.
- ❖ Proper storage and transportation of collected blood units to the blood bank.

Participation and Impact:

a) Community Health Camp: The Community Health Camp witnessed significant participation from Acharya Institute of Technology students, faculty, and staff. Several volunteers, including medical professionals, supported the camp by providing their expertise and services. The camp successfully served a large number of individuals, offering free health check-ups, consultations, and diagnostic tests. Participants benefited from the health education materials provided and gained valuable insights into preventive healthcare measures.

b) Blood Donation Camp: The Blood Donation Camp received an overwhelming response from donors. Many individuals, including students, faculty, and community members, actively participated in the blood donation drive. The camp collected a substantial number of blood units, contributing to the local blood bank's efforts to meet the community's transfusion needs. The event played a crucial role in raising awareness about the importance of voluntary blood donations and fostering a sense of social responsibility among the participants.

Conclusion:

The Health Camp and Blood Donation Camp organized by NSS unit, Electrical and Electronics Department, Acharya Institute of Technology proved to be a successful endeavor in promoting community health and fostering a spirit of social service. The event provided valuable healthcare services to the community and facilitated voluntary blood donations to support the local blood bank. By engaging students, faculty, and the staff, the camp created an environment of awareness, collaboration, and goodwill. Such initiatives contribute significantly to building a healthier and more caring society.
